ALMOND

5	<p>All In One Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen. 15 ft. tree, very winter and frost hardy. Self Fruitful. 300-400 chill hours. Harvest late Sept to early October</p>	Nemaguard 15-25ft
---	---	----------------------

APPLE

5	<p>Anna Remarkable fruit for mild winter climates. Heavy crops of sweet, crisp, flavorful apples. Great fresh eaten or cooked. Stores well for 2 months Self Fruitful. 200 chill hours. Harvest late June to early July</p>	M-111 20ft
25	<p>Fuji Sweet, very crisp and flavorful, excellent keeper. Reddish orange skin, sometimes russeted. Excellent pollinizer for other apple varieties. Self Fruitful. 500 chill hours. Harvest late September to early October</p>	M-111 20ft Geneva 8-10ft
10	<p>Gala Wonderful dessert apple. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish orange over yellow. Good pollinizer. Self Fruitful. 500 chill hours. Harvest mid to late August</p>	M-111 20ft
5	<p>Granny Smith Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer, thrives in hot climates. Prolonged bloom: good pollinizer for other apples. Self Fruitful. 400 chill hours. Harvest October to November</p>	M-111 20ft
5	<p>Golden Delicious Long-time favorite for its sweetness and flavor. Reliable producer. Pollinizer for Red Delicious. Self Fruitful. 700 Chill hours. Harvest early to mid September.</p>	M-111 20ft
10	<p>Honey Crisp This exceptionally crisp, juicy, sweet apple has a luxurious flavor and has consistently ranked as one of the highest quality apples. The skin is richly coral-colored with a yellow background. Honeycrisp averages over three inches in size and stores well. Pollenized by Gala, Granny Smith, Empire, McIntosh and Red Delicious. 800 chill hours. Harvest August</p>	M-7 20ft Geneva 8-10ft
5	<p>Mutsu 'Crispin' Very large, crisp and flavorful. Pick when green or wait until partly yellow. Pollinizer required: Red Delicious, Granny Smith, Fuji, Gala. 500 chill hours. Harvest mid September to early October.</p>	M-111 20ft
10	<p>Pink Lady Hot climate apple from Western Australia. Very crisp, sweet tart, distinct flavor, good keeper. Skin reddish pink over green when ripe. White flesh resists browning. Self Fruitful. 400 chill hours. Harvest October to November</p>	M-111 20ft Geneva 8-10ft
5	<p>Pink Pearl Unusual pink fleshed, highly aromatic fruit. Medium-sized, cream and pale green skin, sometimes blushed red. Tart to sweet-tart, depending on time of picking. Good keeper. Makes colorful, tasty applesauce. Early, profuse, pink blossoms in spring.</p>	M-111 20ft

APRICOT

- 10-15 **Bongo**
Flowering apricot, large fruit to 2 inches, pinkish-white flowers.
- 10 **Matsubra Red**
Flowering apricot. Masses of double deep rose flowers in early spring make this an outstanding small cultivar. Lightly scented.
- 10 **Shiro Kaga (Ume)**
Flowering Apricot. Prolific white single flowers erupt along the branches in late winter for a thrilling show! A beautiful ornamental specimen that is well-suited to mild winter regions. Plant within view from a window to enjoy the winter show from indoors! An early-bearing apricot with small fruits used primarily in pickling, or for medicinal purposes.
Self Fruitful. 250 chill hours.
- 10 **Single Pink**
Flowering apricot
- 10 **Single White**
Flowering apricot
- 10 **Autumn Glo** Citation
Late season apricot with tremendous flavor. Fruit is medium-sized with good color. 12-15ft
One of the highest scoring apricot varieties at Dave Wilson Nursery fruit tastings.
Self Fruitful. 500 chill hours. Harvest August to September
- 20 **Blenheim** Citation
All-purpose freestone. Sweet, aromatic, flavorful 12-15ft
Self Fruitful. 400 chill hours. Harvest late June to early July
- 10 **Gold Kist** Citation
Flowering apricot. Excellent backyard apricot for warm winter climates. Freestone, 12-15ft
very good quality. Heavy bearing. Self Fruitful. 300 chill hours. Harvest May to June
- 10 **Moorpark** Citation
Long-time favorite of apricot fanciers for its exceptionally rich flavor and aroma. 12-15ft
Reliable producer. Used fresh and for canning.
Self Fruitful. 600 chill hours. Harvest July to August
- CHERRY**
- 20 **Bing** Maxma 14
Large, firm, juicy, sweet, nearly black when ripe. Superb #1 flavor 20ft
Large vigorous tree. Pollenizer required: Black Tart, Van, Rainier, Lapins
700 chill hours. Harvest late May to early June
- 10 **Black Tartarian** Maxma 14
Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 20ft
Pollenizer required: Bing, Stella, Rainier. 700 chill hours. Harvest May
- 15 **Craig's Crimson** Maxma 14
Medium-sized, nearly black, sprightly flavor, early season. Vigorous, productive tree. 20 ft
Pollenizer required: Bing, Stella, Rainier. 700 chill hours. Harvest May

20	<p>Royal Rainier Large yellow cherry with slightly more red blush than Rainier. Excellent flavor, taste test winner. Pollenized by Bing, Black Tartarian and Lapins. 500 chill hours. Harvest late May to early June</p>	Maxma 14 20ft
20	<p>Stella Large, nearly black, richly flavored sweet cherry. Self Fruitful. 400 chill hours. Harvest late May to mid June</p>	Mahaleb 25ft
10	<p>Van Very cold hardy, reliable, heavy bearing. Fine fruit similar to Bing, though usually smaller. Pollenizer required: Bing, Stella, Rainier</p>	Mahaleb 25ft
30	<p>Royal Crimson Consistent producer of large, tasty, crimson-red fruit. This important new variety is also an excellent pollenizer for Minnie Royal and Royal Lee. 200-300 chill hours. Harvest May</p>	Mazzard 20ft

JUJUBE

10	<p>Lang Large pear-shaped fruits are reddish-brown when ripe, eaten firm and crunchy or room-dried to date-like chewy sweetness. Attractive, easy-to-grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Pollenized by Li. 150 chill hours. Harvest late August to October</p>	25ft
10	<p>Li Round shaped fruits are reddish-brown when ripe, eaten firm and crunchy or room-dried to date-like chewy sweetness. Attractive, easy-to-grow tree: hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Pollenized by Li. 150 chill hours. Harvest late August to October</p>	25ft
10	<p>Sugar Cane Round fruit is smaller than Li. Very sweet, crunchy flesh. Tree is precocious, hardy, drought resistant, virtually pest and disease free. Requires long, hot summer. Partially self fruitful. Plant two varieties for cross pollination and heavier crops.. 150 chill hours. Harvest September to October</p>	25ft

MULBERRY

5-20	<p>Pakistan 3 inch long, firm, red to black, sweet fruit. Non-staining juice. Month-long early summer harvest. Fruit used fresh and for pies, jams and jellies. Large, vigorous, disease-resistant tree. Self Fruitful. 400 chill hours. Harvest April to May</p>	30 ft
5-20	<p>Persian Densely foliated tree to 25-30 ft. Large heart-shaped leaves. Large fruit is juicy, dark red to black and good for jam. Self Fruitful. 400 chill hours. Harvest June to July</p>	30ft

10-20 **White** 30ft
 Medium-sized, sweet, white fruit shaped like blackberries. Drought tolerant once established. Grows larger and more rapidly with irrigation.
 Self Fruitful. 400 chill hours. Harvest May

NECTARINE

5 **Arctic Glo** Citation 8 -12ft
 Exciting, sprightly-sweet, early season white-fleshed nectarine. High scoring in taste tests: nice balance of sugar and acid, very appealing flavor. Highly recommended for home orchards. Self Fruitful. 400-500 chill hours. Harvest June to July.

5 **Arctic Queen** Citation 8 -12ft
 Delicious, super-sweet white nectarine. Rich flavor and nice crunchy texture when firm ripe, extremely sweet when fully ripe. High-scoring in taste tests.
 Self Fruitful. 600-700 chill hours. Harvest August

10 **Double Delight** Citation 8 -12ft
 Sensational fruit. Consistently one of the best flavored yellow nectarines plus magnificent, double pink flowers. Dark red-skinned freestone fruit is sweet, with unusually rich flavor. Very high scoring in taste tests. Heavy bearing tree.
 Self Fruitful. 300 chill hours. Harvest July

10 **Gold Mine** Citation 8 -12ft
 Long-time favorite. Small to medium-sized white-fleshed freestone. Aromatic, juicy and sweet. Self Fruitful. 400 chill hours. Harvest August

10 **Heavenly White** Citation 8 -12ft
 One of the highest-scoring fruits in Dave Wilson Nursery taste tests. Very large, firm, white-fleshed freestone. Superb acid/sugar balance and rich, complex flavor, a connoisseur's delight. Dull red and cream colored skin.
 Self Fruitful. 650 chill hours. Harvest July

5 **Liz's Late** Citation 8 -12ft
 Sprightly sweet, intense, spicy flavor - the state of the art in fruit breeding. Tree bears reddish-yellow nectarines in late summer. Fruits store well and are perfect for canning or cuisine. Freestone.
 Self Fruitful. 600-700 chill hours. Harvest late August to September

5 **Necta Zee Miniature** Lovell 6 ft
 Sweet, very flavorful yellow freestone, beautiful red skin. Strong, vigorous tree. Easily covered to protect blooms from frost.
 Self Fruitful. 400 chill hours. Harvest mid June to Late July

10 **Snow Queen** Citation 8 -12ft
 Taste test winner. Sweet, juicy, early season white freestone. Retains a satisfying amount of acid to balance the sweet. Long-time favorite.
 Self Fruitful. 200 chill hours. Harvest June to July.

PEACH

25	<p>Babcock White Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. High scoring in taste tests. Self Fruitful. 300 chill hours. Harvest July.</p>	Citation 8 -12ft
10	<p>Baby Crawford The best-flavored peach, according to California Rare Fruit Growers in the Santa Clara Valley area. Small, intensely flavored yellow freestone. Golden orange skin with slight blush. Self Fruitful. 700-800 chill hours. Harvest late July to August</p>	Citation 8 -12ft
20	<p>Donut ‘Stark Saturn’ Also called Saucer or Peento Peach. Unique white-fleshed fruit with a sunken center (shaped like a doughnut). Sweet, with a mild flavor described by some as almond-like. Self Fruitful. 200-300 chill hours. Harvest late June to July.</p>	Citation 8 -12ft
5	<p>Honey Babe Miniature Excellent quality fruit. Yellow freestone with sweet, rich, delicious flavor. Heavy bearing 5-6 ft. tree is easily covered to protect blooms from frost. Self Fruitful. 400 chill hours. Harvest July</p>	Lovell 6ft
10	<p>July Elberta Also called Early Elberta. Reliable heavy crops. Juicy, sweet, very flavorful yellow freestone fruit for canning, freezing, or fresh use. Self Fruitful. 400-500 chill hours. Harvest July.</p>	Citation 8 -12ft
10	<p>La Feliciana Heavy-bearing, high quality peach from Louisiana. Firm, flavorful, yellow freestone. Resists brown rot and bacteriosis. Self Fruitful. 400-500 chill hours. Harvest July</p>	Nemaguard 15-25ft
5	<p>O’Henry Popular fresh market yellow freestone and an excellent choice for home planting. Large, firm, full red skin, superb flavor. Good for freezing. Strong, vigorous, heavy bearing tree. Self Fruitful. 750 chill hours. Harvest August.</p>	Citation 8 -12ft
10	<p>Red Baron Large, juicy, firm, richly flavored yellow freestone fruit. Highly rated in taste tests. Showy double red blossoms. Long-time favorite. Self Fruitful. 250-300 chill hours. Harvest July to August</p>	Citation 8 -12ft
10	<p>Sauzee Swirl For white peach lovers! Sauzee Swirl is a new saucer "donut" style peach from Zaiger Genetics. Beautiful white flesh with red marbling and a pronounced flavor that keeps you wanting more. Medium sized clingstone. The ripe fruit is distinctively ornamental hanging in the tree, and beautiful when served cut open. Self Fruitful. 400 chill hours. Harvest May</p>	Citation 8 -12ft
5	<p>Strawberry Free Long-time favorite white freestone peach. Very sweet, aromatic, juicy, with superb, delicate flavor. Highly recommended for home orchards. Self Fruitful. 400-500 chill hours. Harvest June to July</p>	Citation 8 -12ft
5	<p>Suncrest Large, very firm, deliciously sweet yellow freestone. Bright red skin over yellow. Frost hardy blossoms, consistent producer. Self Fruitful. 500 chill hours. Harvest July</p>	Citation 8 -12ft

PEAR

- | | | |
|----|--|--------------------|
| 10 | Bartlett
World's most popular pear. High quality, tolerates hot summers.
Self-fruitful or pollenized by Bosc, D'Anjou, Winter Nelis. 500-600 chill hours.
Harvest August | OHxF333
12-16ft |
| 10 | Bosc
Long and narrow shape, brown skin. Superb quality, one of the best. Use fresh or cooked. Susceptible to fire blight in warm, moist climates.
Pollenized by Bartlett or other pear. 500-600 chill hours. Harvest September | OHxF333
12-16ft |
| 10 | Blake's Pride
This yellow and light-golden pear gives a reliable harvest of aromatic, juicy fruit that melts in your mouth. Resistant to fire blight. Pollenized by Bartlett, Harrow Delight or Warren. 800 chill hours. Harvest September. | OHxF333
12-16ft |
| 10 | Fan Stil
Bell-shaped yellow fruit with red blush. Crisp, juicy white flesh. Consistent bearer. Shows some fireblight resistance. Self Fruitful. 400 chill hours.
Harvest August to September. | Pear
20ft |
| 10 | Harrow's Delight
Fire blight resistant, fruit similar to Bartlett. Yellow skin with attractive red blush. Smooth, fine flesh is especially flavorful. Ripe two weeks before Bartlett. Heavy bearing tree. Pollenized by Bartlett, Bosc, D'Anjou. 800 chill hours. Harvest July | OHxF333
12-16ft |
| 10 | Warren
Excellent quality dessert pear, tree is highly resistant to fire blight. Medium to large, long-necked fruit with pale green skin, sometimes blushed red. Beautiful natural branching structure. Smooth flesh (no grit cells) is juicy and buttery with superb flavor. Good keeper. Self Fruitful. 800 chill hours. Harvest August | OHxF333
12-16ft |

PEAR (ASIAN)

- | | | |
|----|---|--------------------|
| 10 | 20th Century
Juicy, sweet, mild flavored fruit is crisp like an apple. Keeps well. Easy to grow, heavy bearing small tree. Self-fruitful or pollenized by Shinseiki, Bartlett.
300-400 chill hours. Harvest August | OHxF333
12-16ft |
| 10 | Hosui
Consistently rated the best-tasting Asian pear at Dave Wilson Nursery fruit tastings. Large, juicy, sweet, flavorful, refreshing, crisp like an apple. Brownish-orange russeted skin. Pollenized by Shinko, Chojuro, Bartlett or 20th Century.
300-400 chill hours. Harvest August | OHxF333
12-16ft |
| 10 | Shinko
Late ripening, excellent quality. Juicy, sweet, flavorful, refreshing, crisp like an apple. Golden brown russeted skin. Pollenized by Hosui, Chojuro, Kikusui, Bartlett
450 chill hours. Harvest September | OHxF333
12-16ft |

PERSIMMON

30	Fuyu 'Jiro' Medium size, flat shape, still crunchy when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Self Fruitful. 200 chill hours. Harvest October to late November.	D. Lotus 25ft
0-10	Giant Fuyu Larger, not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow, cool or hot climates. Self Fruitful. 200 chill hours. Harvest October to November.	D. Lotus 25ft
10	Hachiya Large, deep orange-red, acorn-shaped. Hot summer required to mature the fruit. Sweet, flavorful, astringent until soft ripe. Mature fruit can be frozen and thawed to ripen. Productive, ornamental tree. Self Fruitful. 200 chill hours. Harvest November to December.	D. Lotus 25ft
0-25	Izu Very sweet, tasty, non-astringent fruit ripens about three weeks before Fuyu. Medium to large size, round shape. Relatively small tree, good choice for backyard persimmon. Self Fruitful. 100 chill hours. Harvest late September to October.	D. Lotus 15ft
 <u>PLUM</u>		
5	Bavay's Green Gage Small to medium-sized, richly flavored & very sweet. Excellent fresh and for cooking. Self Fruitful. 700 chill hours. Harvest August.	Citation 8 -12ft
10	Burgundy Maroon colored skin and semi-freestone flesh. Sweet, with little or no tartness and a very pleasing, mild flavor. High taste test scores. Prolonged harvest. Very productive tree with narrow, upright habit. Self Fruitful. 300 chill hours. Harvest July to August	Citation 8 -12ft
10	Persian Green Small sour plum. Crisp, dark yellow flesh. Widely grown and recognized among Middle Eastern cultures. Early ripening. Self Fertile. 350-400 hours. Harvest April to May	Myro 29C 15-25ft
20	Santa Rosa Most popular plum in California and Arizona. Juicy, tangy and flavorful. Reddish purple skin, amber flesh tinged red. Self Fruitful. 300 chill hours. Harvest June to July	Citation 8 -12ft
10	Satsuma Long-time favorite plum in California. Mottled maroon over green skin, dark red meaty flesh. Sweet, mild, not tart. Excellent for jam. Pollenized by Santa Rosa or Beauty. 300 chill hours. Harvest August	Citation 8 -12ft
5	Weeping Santa Rosa One of the most flavorful, aromatic Japanese plums when fully ripe. Weeping growth habit with long slender limbs that bow gracefully to the ground. Easily espaliered. Self Fruitful. 200-400 chill hours. Harvest June to July	Myro 29C 15-25ft

PRUNE

- 5 **Sugar** Citation
Reddish purple skin, greenish yellow flesh, very sweet. Used fresh and for canning. 8 -12ft
Self Fruitful. 550 chill hours. Harvest August

PLUOT

- 5 **Dapple Dandy** Citation
Taste test winner. Ranks among the all-time top five best flavored fruits at Dave 8 -12ft
Wilson Nursery tastings. Creamy white and red fleshed freestone with wonderful plum-
apricot flavor. Skin greenish-yellow with red spots, turning to a maroon and yellow
dapple.
Pollenized by Flavor Supreme pluot, Flavor King pluot, Santa Rosa plum, Catalina
plum, or Burgundy plum. 400-500 chill hours. Harvest August

- 5 **Flavor King** Citation
Taste test winner. Unique plum-apricot hybrid with sensational bouquet and sweet, 8 -12ft
spicy flavor. Reddish-purple skin, crimson flesh. Naturally small tree.
Self Fruitful. 400 chill hours. Harvest August to September

- 5 **Flavorosa** Myro29C
Deep purple-skinned fruit with red flesh. Mild, sweet flavor. 15-25ft
Pollenized by Emerald Drop Pluot® or Mariposa plum.
250 chill hours. Harvest late May to June.
